

GLORIA IVONE MAYO ARANGO

Systems Engineer | Product Owner | Software Quality & Digital Project Management

(1) 437-677-9018 | givone@hotmail.com | gloriamay.com | linkedin.com/in/gloriamayo | Woodbridge, ON, Canada

PROFESSIONAL SUMMARY

Systems Engineer with 15+ years of experience in public-sector IT platform administration, software quality assurance under ISO 9001, and digital project coordination in Colombia, combined with hands-on operational experience in Canadian logistics since relocating in 2020. Registered Microsoft Partner currently pursuing the Dynamics 365 Sales Functional Consultant Associate certification, and founder of AppointSuite, an independent CRM/booking product whose end-to-end delivery — from requirements to production deployment — she led using AI-assisted development. Seeking to bring quality assurance discipline and bilingual, multicultural adaptability to a technical support, systems administration, or project coordination role in Canada.

INDEPENDENT PROJECT

Founder & Product Owner — AppointSuite 2026 – Present

- Led the design, coordination and delivery of a multi-tenant SaaS booking and CRM platform for local service businesses using Python and Django
- Defined the functional data model and core business workflows: appointment scheduling, customer management, reminders and reporting
- Coordinated solution design, client onboarding and production deployment
- Leveraged AI-assisted development tools to translate business requirements into a production-ready SaaS solution
- Worked directly with small business owners to gather requirements, validate functionality and iterate on product improvements based on customer feedback
- Managed the product roadmap, stakeholder communication and client relationships, including a live implementation for a real Canadian business (Vaughan Sewing)
- Portfolio and live project demos: gloriamay.com

TECHNICAL SKILLS

- Institutional platform administration & technical support (ISolución, SIVICO, MECI)
- Software quality assurance & testing under ISO 9001:2015
- Software & technology procurement, market research and vendor contracting (Microsoft, Adobe, network security)
- Requirements gathering and vendor supervision for custom software development
- Risk management frameworks (ISO 31000)
- Microsoft 365 · Microsoft Partner Network · Dynamics 365 Sales (in progress)
- Python · Django · AI-assisted software development
- Foundational knowledge of HTML and CSS (university coursework and self-directed study)
- Git & GitHub (via VS Code / AI-assisted workflows)
- Data management and IT systems administration

PROFESSIONAL COMPETENCIES

- Digital and software project coordination
- Administrative and document management
- Customer focus and professional written communication
- Organization, prioritization and deadline management
- Cross-functional collaboration and problem solving
- Bilingual communication and multicultural adaptability

PROFESSIONAL EXPERIENCE

Costco Canada — Vaughan, ON 2022 – Present

Machine Operator, ISO-Certified Facility

- Perform receiving, inventory control and truck-loading operations under Costco's ISO-certified quality and safety protocols

- Certified forklift operator and certified in electric pallet jack (EPJ) operation (Canada + Costco certification)
- Certified in food-handling safety standards and in Transportation of Dangerous Goods (TDG), Canada (2025)
- Apply Canadian workplace compliance standards daily in a high-volume, English-speaking logistics environment

Government of Antioquia — Colombia 2008 – 2020

University Professional, Systems Department

- Administered and provided technical support for ISOLución, the institutional ISO 9001:2015 quality-management platform; planned annual software contracting and implemented new system versions
- Performed quality testing on institutional platforms, logged QA activity, filed non-conformity reports, and drove corrective actions to resolve compliance issues
- Led requirements gathering and supervised third-party development of SIVICO, a mobile system for departmental revenue surveillance and control
- Planned, researched and supervised annual procurement of Microsoft and Adobe corporate software, and network-security software acquisitions
- Delivered technical platform support to institutional end users

IDEA – Institute for the Development of Antioquia — Colombia 2008

IT Contractor, Data Management (MECI System)

- Entered, validated and managed data within the government's MECI quality-management system

Early Career — Medellín, Colombia 1989 – 2007

Administrative & Technical Support Roles

18 years of prior experience in administrative management, technical help-desk support and software sales — including secretarial and management-support roles at CDO Business Group, help desk support at Empresas Públicas de Medellín, and sales direction for software solutions at Standard Systems, a technology company she co-owned.

EDUCATION

- Bachelor's Degree in Systems Engineering — Antonio Nariño University, Bogotá, Colombia (2008). Thesis: mobile software development in Java/SQL
- Technologist in Data Systematization — Antonio Nariño University (2005). Thesis: design and development of a Document Manager
- Specialization in State Contracting — University of Medellín (2017)
- Law studies (4 semesters, not completed) — C.U. de Colombia (2013)

PROFESSIONAL DEVELOPMENT

- Microsoft Partner Network member; reseller-enabled for Microsoft products; currently pursuing Dynamics 365 Sales Functional Consultant Associate (MB-210)
- SQL Fundamentals — academic certifications, Colombia (2008)
- Transportation of Dangerous Goods (TDG) Certification, Canada (2025)
- Certified Forklift & Electric Pallet Jack (EPJ) Operator, and Food-Handling Safety Certification, Canada
- ISO 31000 Risk Management
- Quality Management Systems / Quality in Software Development
- Public Procurement (State Contracting)
- English as a Second Language — ongoing (Toronto immersion program)

LANGUAGES

- Spanish: Native
- English: Intermediate (proficient reading/writing; developing conversational fluency)
